

Bold Connect

Always connected and in control

bold

The Bold Connect is a bridge to connect your Bold Smart Lock with the internet, designed for remote access monitoring and control where keys are no longer needed.

FEATURES

- Remotely activating your Bold Smart Lock from any location from your mobile app
- Monitoring or getting notified of all lock activities (i.e. PIN activations and battery level status)
- Option to start using the web portal to easily manage your access solution
- Considerable freedom of placement for installation
- Enables the connection of multiple locks to one Bold Connect
- Easy set-up as available locks are automatically discovered
- End-to-end data encryption on all connected devices
- Two-factor user and device authentication

ALWAYS CONNECTED

LONG RANGE

DIGITAL SECURITY

MECHANICAL SPECIFICATIONS

PRODUCT DEFINITION The Bold Connect enables your Bold Smart Lock to be permanently connected in order to manage and control your locks from the app from anywhere. With a slim form factor, mounting options and a USB(C) interface for an external flexible power supply the Bold Connect can be easily installed anywhere, out of sight, or integrated into existing access control solutions.

HOUSING MATERIAL PC, PC/ABS, RoHS, REACH compliant

DIMENSIONS 68mm x 68mm x 23mm

WEIGHT 200 grams

OPERATING TEMPERATURE +10°C to 40°C (not intended for outdoor use)

POWER

USB POWER The Bold Connect is powered directly from a USB-C interface. The USB power adapter, a 1.2m cable and four different wall socket adapters (EU, UK, US, AU) are included.

COMMUNICATION

BLUETOOTH 5.0 LONG RANGE The communication between Bold Connect and a Bold Smart Lock is via Bluetooth 5.0 Long Range. This enables the Bold Connect to connect and communicate more easily with many Bold Smart Locks.

WIFI The Bold Connect is connected through Wi-Fi in order to communicate with your telephone. Permanent Wi-Fi (802.11 b/g/n) internet connection required.

DIGITAL SECURITY AES128 End-to-End Encryption
2-Factor Authentication

MOBILE APPLICATION

IOS APP ANDROID APP **Additional functionalities in the App when using Bold Connect:**

- Remotely activating connected Bold Smart Lock
- Instant granting and revoking backup PIN codes
- Status check and updates of firmware Bold Smart Lock
- Overview of all your connected Bold Smart Locks
- Real time battery monitoring

In the app, the Bold Connect is activated by connecting it to Wi-Fi. Using its auto-discover functionality and Bluetooth Long Range it automatically pairs with your Bold Smart Lock(s).
